

Las Virgenes Municipal Water District
Request for Quotes - Services

*****Quote Due Date: Oct 31, 2024*****

Description of Services Requested:

Las Virgenes Municipal Water District is seeking quotes from firms interested in providing Annual Reclaimed Reservoir Cleaning and Inspections:

Reservoir 2 - 14.7MG	4232 Las Virgenes Rd., Calabasas
Indian Hills Tank - 2.5MG	Canyon Way, Agoura - Dia.120', Height 33'
Cordillera Tank – 3.0MG	Prado De Los Cervos, Calabasas -Dia. 132', Height 33'
Parkway Tank – 0.13MG	Prado Del Grandioso, Calabasas- Dia.40', Height 20'

- 1) The Las Virgenes Municipal Water District is located in Western Los Angeles County with headquarters at:
4232 Las Virgenes Road
Calabasas, CA 91302
- 2) The Las Virgenes Municipal Water District operates numerous pump stations and facilities related to the operation of its reclaim water system.
- 3) Services will be provided during normal business hours. Normal business operating hours are Monday through Friday between 7:30 am- 4:00 pm at all locations.
- 4) Terms of the Agreement shall be for one (1) year with the option to renew said agreement for no more than four (4) years subject to price modifications that have been agreed upon by the District and Contractor pursuant to the provisions of these specifications.
- 5) A set inflation indicator shall be stated in the proposal. Pricing shall remain firm for the first (1) year, while renewal periods will be in increments of one-year using the stated indicator and shall not exceed four renewal periods.

Quote:

It is intended that the successful firm will enter into a fixed price agreement with the District for the services requested in the **Scope of Work**.

Scope of Work

- Vendor shall inspect current conditions of the internal and external components of the four reclaimed water reservoirs along with structural integrity.
- Indian Hills, Cordillera and Parkway tanks are to be cleaned and inspected once (1) per calendar year.
- Reservoir 2 is to be cleaned and inspected twice (2) per calendar year, once in the spring and the second in the fall. (Allow 4 days to clean the reservoir per visit).
- Vendor must be able to clean the three reclaimed tanks of up to 3" of sediment using an underwater suction vacuum while causing minimal turbidity.
- Reservoir 2 is to be cleaned of up to 6" of sediment with the possibility of removing dead vegetation using an underwater suction vacuum while causing minimal turbidity.

- Diver must wear a vulcanized rubber dry suit that is in proper working condition.
- A high-definition video of the cleaning and inspection process must be provided to LVMWD upon completion of each reservoir.
- A detailed written report with photos must be provided upon completion of each reservoir.
